

Solutions are our World "Worldwide"

Al-Abd Corporation was established in 1973 as a trading company and an indenting house dealing in flexible packaging materials for the food & pharmaceutical industries. The mass scale growth of these two segments resulted in diversification & expansion of our scope of supply & we now offer specialized services not only to the food & pharmaceutical industries but to the printing & converting industries as well. Our principals are all, well established and famous enterprises with an extensive & rich experience in their respective fields. From these companies we are well placed to serve both large & small scale customers to the best of their satisfaction. To facilitate personalized service, in 1994, a branch office in Lahore was established to cater to the needs of customers located in the central & northern Pakistan. We are now a well-known name in these sectors and have the privilege of serving many famous brand owners.

As part of our service program, we offer complete processing lines with technology transfer for the following food products :

- Bubble gum & chewing gum.
- Candy, toffee & lollipop.
- Licorice & marshmallow.
- Cup jelly & gummy jelly.
- Juice & mineral water.
- Chocolates.
- Biscuits, wafers & layer cake.
- Potato chips, extruded & expanded snacks .

A good package moves much faster on the shelf. A wide variety of packaging machines are available to create attractive packaging, such as:

- Pillow, double twist, blister, fold wrap & stick pack for candy, toffee, bubble & chewing gum.
- Single twist & sachet pack for lollipop.
- Flowpack for licorice, marshmallow, layer cake, chocolates, biscuits & wafers.
- Pouch pack for rice, tea, snack food & gummy jelly.
- Cup pack for dessert jellies, jam & butter.
- Filling & capping lines for juice & mineral water.

Our scope of supply to the pharmaceutical sector revolves around:

- Processing, filling , capping, labeling machines for powder, syrup, capsules & tablets.
- Blow, fill & seal machines for IVsolution.
- Packing machines for sachet, blister, strip & tropical foil.
- Cartoning & flow pack machines for blisters & strips.

Owing to sensitivity of the products, it is often obligatory to imprint manufacturing / expiry dates and batch numbers on the package. This is possible through the industrial ink jet printer which can print all the desired information.

A careful selection of packaging material ensures a longer shelf life & eye catching appearance for a faster turnover. Through the network of our principals, specializing in different types of flexible packaging materials, we provide customized packaging solutions to our customers in the food & pharmaceutical sectors. Our delivery program covers::

- 2 layer laminates for candies, bubble gums, biscuits, chocolate & snack food.
- 3 layer laminates for food dressings, instant powder drink, re-hydrate salt & other pharmaceutical products.
- Aluminium foil for blister, strip & tropical (cold formable) packaging of tablets & capsules.

Our delivery program to the printing & converting industries comprises of:

- Cast & blown film production lines.
- Vacuum metalliser.
- Rotogravure & flexographic printing machines.
- Extrusion, dry, wet & solventless laminators.
- Slitters, rewinders & inspection machines.
- Bag making machines.
- Flexible packaging films, aluminium foil & paper.

Among the ancilliary equipments for the printing & converting machines, we can offer magnetic powder brake, clutch, auto tension control, edge position control, auto registration control & air shafts.
